

1, Types of mediums ?

- * Radio frequency - wireless
- * Electrical medium - wired $\rightarrow$ utp cable
- * Light signal $\rightarrow$ fiber optic cable

2, Write down switch 8-pins ?

- | | | |
|---|------------------|---------------------|
| 1 | +R $\rightarrow$ | Receive positive |
| 2 | -R $\rightarrow$ | Receive negative |
| 3 | +T | Transmit positive |
| 4 | +V | Voltage power value |
| 5 | -V | Voltage power value |
| 6 | -T | Transmit negative |
| 7 | - | |
| 8 | - | unused. |

3, Connect utp cable between two devices

This cross cable connect

4, Explain AUTO MDIX ?

Auto MDIX is automatically detects and swaps the Tx and Rx pairs, allowing either a straight or crossover cable to connect without manual configuration

5, Explain POE injector ?

6, Explain POE switch ?

7, Explain types of nic & function ?

Types of NIC

- * wired NIC → to connect RJ45, ethernet cable etc.
- * wireless NIC → to radio signal

function of NIC

- * connect a device
- * It contain MAC and IP address
- * It convert binary into electrical signal and electrical signal to binary value.
